**Part-B [30]**

**Read the following Case Studies/Questions carefully then start your writing:** [10X3=30]

**3.** Bangladesh recorded one of the fastest growth rates in the world in the past few years with a stable economic performance that has helped to reduce poverty and social inequalities. GDP growth was estimated to have reached 7.9% in 2019 and is forecast to fall to 2% in 2020 due to the outbreak of the COVID-19 and pick up to 9% in 2021, according to the International forecast. Do you agree with this forecast on the economy of Bangladesh? - Justify your position with proper example descriptively.

**4.** The ICT industry in Bangladesh is relatively small compared to the size of its national population and the size of the national economy. However, the industry in this country has started rapidly growing in recent years. The average yearly growth rate of the industry here has been over 20 percent in recent years, and this growth rate is expected to continue. In this situation, what do you think about the future of the ICT industry in Bangladesh? How can you play an important role in booming this industry here?

**5.** If you were the Environment Minister of Bangladesh, what would be the role of you to protect the environment from pollution?
